**SYNTHETIC LUBRICANTS & COMPRESSOR OILS**

**Industri-Lube Synthetic Compressor Oil**

Bart & Associates proprietary Premium quality synthetic air compressor oil are compatible and mixable with compressor OEM oils, and also meet and/or exceed the OEM oil specifications and performance. We supply replacement oils for all brands, including Atlas Copco, Gardner Denver, Ingersoll Rand, Kaeser, Quincy, Sullair, and others. Whole line of synthetic lubricants for many applications such as food grade, gear, vacuum pump, blower and high temperature chain requirements.

**Customers**

Bart & Associates has supplied products to these excellent companies and organizations:

**Industrial Equipment & Engineered Systems**

Packaged Chiller Systems
Packaged Cooling Systems
Compressed Air & Gas Dryers
Heat Exchangers, Oil Coolers
Replacement Tube Bundles
Oil Water Separator Systems
Waste Water Evaporators

**Industrial Supplies**

Air Compressor Filters
Industrial Filter Elements
Desiccant Breathers
Descalers & Degreasers

**Synthetic Lubricants & Compressor Oils**

Air Compressor Oils
Food Grade Oils
Blower Oils
Industrial Gear Oils
Vacuum Pump Oils
Chain Oils

High Quality Industrial Equipment, Engineered Systems and Supplies
Standard and custom built chiller and dryer models ranging from 5 to 500 tons. The Nortec line of industrial chiller/dryer systems is one of the best in the industry. High quality components and competitive prices coupled with an array of optional features makes our chillers/dryers ideal for a vast range of applications across many industries. Our chillers/dryers are designed to suit your exact requirements and are offered as complete package units with add-on modules like air/water cooled condensers, single/duplex pumping stations and sophisticated control systems offering SCADA interface, remote access and customized operator interface. Visual displays, alarm features and fail safe mechanisms are built into these packages to ensure safe and trouble free operation for the entire life of the machine.

Packaged Chiller Systems & Dryers

Heat Exchangers & Replacement Tube Bundles

Supplying high quality shell & tube and fin-fan heat exchangers from top industry manufacturers to meet your application needs and requirements. Replacement aftercoolers, intercoolers and tube bundles for most compressor brands and industrial applications. Coolers for new projects with specific requirements are custom built to include pumping stations, storage tanks, special materials and explosion proof electrical if necessary.

Industrial Filter Elements

Data base of over 1,000,000 filters for almost any industry. Types include:
- Hydraulic
- Lube oil
- Turbine
- Dust collector
- Bag filters
- Liquid
- Blowers
- Vacuum
- Oil mist
- Fuel

Air Compressor Filters

Descalers

Premium water-based scalers designed to clean and dissolve lime, scale, dirt, and rust deposits in heat exchangers and water-cooled equipment such as air compressors, vacuum pumps, plastic injection molding equipment, blowers and boilers. Our scalers are completely non-hazardous, non-toxic and biodegradable in their original state.

Desiccant Breathers

Our breathers are air filter and water vapor removal systems designed to replace traditional breather caps on fluid containing reservoirs, storage tanks and gearboxes. The breathers block out moisture and other contaminants in these systems, thereby improving performance. Each breather is outfitted with a clear, rugged polycarbonate casing that allows easy view of color-indicating desiccant in order to monitor when the breather should be replaced.

Oil Water Separator Systems

Our above ground Oil Water Separators can process from 0.5 to 5000 GPM of wastewater from various sources including air compressor condensate, machine coolants, paint booth water, die cast solutions, mop water, parts washer water, storm water, boiler water, and other water-based wastes. The systems we supply feature an excellent discharge oil carryover down to 10 ppm or less using coalescing media. Systems include a number of options such as air-operated pumps & controls, freeze protection, high temperature designs and many others as required by specific customer applications.

Industrial Waste Water Evaporator Systems

Our evaporators will process from 4 to 40 gallons per hour of wastewater from a number of applications containing non-volatile water based liquids. Systems are electric or gas fired and can be made of stainless or carbon steel, and are built to operate 24/7 with many safety features included. With our simple yet efficient design, our systems are very reasonably priced allowing for a quick pay back especially as disposal costs for unwanted wastewater continue to increase significantly each year.
